### TO WHOM IT MAY CONCERN

Production of CRC Plasticote, product code 2043 required a change to the batch code stamping procedure. The "batch code" has been upgraded to include the time of manufacture as well as the current code.

This change is for improved quality control procedures.

For a short time both batch code systems will be circulating in the market.

This change is effective on all Plasticote aerosols produced after the 28<sup>th</sup> of November 2011. The first batch (date code) is 2/047.
